Outpatient EEG [443074674]

Resulted: 09/02/21 2302, Result status: Final result

Ordering provider: System, Provider Not In 09/02/21 1032
Resulted by: Ma, Brandy Boyee, MD
Performed: 09/02/21 1227 - 09/02/21 1227
Narrative:

Order status: Completed
Filed by: Ma, Brandy Boyee, MD 09/02/21 2305

VIDEO-EEG RECORDING AWAKE & DROWSY - EXTENDED > 1 HOUR

Date of Service: 09/02/21

Patient Name: Robert T Brockman
MRN#: 003768603
Date of Birth: [REDACTED]
Attending MD: Brandy Ma, MD

Technique: Recordings were obtained using a standard international 10-20 electrode placement supplemented with a single electrocardiogram chest electrode. The recordings were obtained using a reference electrode and reformatted digitally into sequential bipolar and referential montages for review.

Indication: 80 y.o. year old male referred for video-EEG to evaluate for seizures.

Findings:

Background: The background is continuous, composed of predominantly alpha and theta frequencies, with normal voltages and fair anterior to posterior organization. There is a reactive posterior dominant rhythm of 7 Hz.

With drowsiness, there is the expected attenuation of the posterior dominant rhythm. Sleep is not captured.

Hyperventilation: was not performed
Photic stimulation: was performed with no evidence of photic driving

Interictal: There are no epileptiform discharges or seizures captured.

09/02/2021 - ELECTROPHYSIOLOGY in HMH NEUROPHYSIOLOGY (continued)

Imaging/Tests (continued)

Impression:

This is a mildly abnormal Video-EEG study characterized by diffuse slowing of the background, a non-specific indicator of global cerebral dysfunction. There are no epileptiform discharges or seizures captured.

Brandy Ma, MD

ICD-10 Code: R569

Procedures Performed

Chargeables

EEG MONITORING EXTENDED > 1 HR [NEU162]

Indications

Encephalopathy [G93.40 (ICD-10-CM)]
Delirium, puerperal [F05 (ICD-10-CM)]

Signed

Electronically signed by Ma, Brandy Boyee, MD on 9/2/21 at 2305 CDT
